Room #: 112
Phone #: 208-288-2928 ext 112
Office Hours: 12:45 p.m. to 3:00 p.m.

Networking 1A course covers an introduction to the Linux operating system, as well as an introduction to different scripting technologies. It will serve as a foundational course for more advanced topics such as networking, cybersecurity, and cloud platforms development, which are taken during the junior and senior years of the focus area.

Students will learn the following concepts involving Linux:

- Installation
- GUI and CLI
- Configuration and software installation
- User Management
- Scripting
- Cloud and virtualization

This course will follow the MTCHS handbook policy regarding missing and late homework.

Expectations

- Have fun, loosen up, and enjoy what you're learning.
- Have a positive attitude (and if you struggle with that, figure out how to fix it, including talking to me).
- Communicate: If you are having issues at school or in your personal life that are making things difficult, talk to me and let's work a plan.
- If you are caught up to where you need to be according to our class schedule, you can work on other schoolwork.

Late Work, Make-Up, and Redo Policy

Late Work

Work for the current module is considered due by midnight the day it is assigned. Students may receive no more than 70% for any late assignment. Any missing or late assignment may be submitted up to two (2) school business days after the due date. Exceptions to this policy may be requested by the student in writing or email. The instructor will make the final determination on extension requests and will inform the student of the decision.

Make-Up Work

Students may be allowed up to two days per unexpected absence to complete make-up work. Unexpected absences are those due to sudden illness, injuries or death in a family. In general, tests will not be rescheduled, the instructor will make this final determination on a case-by-case basis.

Redos

If a student receives below a 70% on a test, a student may redo that test for a grade up to 70%. The instructor will determine the date by which the redo needs to be completed.
