National Contest Program #1

Food Program

You will write a program to create a screen which will allow the user to enter quantities of items to purchase from your food truck. Taxes are included in the price. You must have a running total of all sales for the day.

Item for sale: Hot Dog $2.50

Brat $3.50

Hamburger $5.00

Fries $2.00

Soda $2.00

Water Free

Buttons or choices will include:

Calculate

Clear (allows for another entry, reset to another amount)

Exit

All screens will be clearly labeled with contestant number, program number and title.

All boxes will be clearly labeled.

When you have completed this program put your number and time on the sheet for the first program, the judge will take you in turn for execution of your program to check for correct output. When approved, print out your source code. Clearly mark with your assigned contestant number and hand in to the judges table. Go on to the next program.
